Making Multicultural Families in Europe-Isabella Crespi 2018-03-13 This edited collection explores family relations in two types of 'migrant families' in Europe: mixed families and transnational families. Based on in-depth qualitative fieldwork and large surveys, the contributors analyse gender and intergenerational relations from a variety of standpoints and migratory flows. In their examination of family life in a migratory context, the authors develop theoretical approaches from the social sciences that go
beyond migration studies, such as intersectionality, the solidarity paradigm, care circulation, reflexive modernization and gender convergence theory. Making Multicultural Families in Europe will be of interest to students and scholars across a range of disciplines including migration and transnationalism studies, family studies, intergenerational studies, gender studies, cultural studies, development studies, globalization studies, ethnic studies, gerontology studies, social network analysis and social work.

**Routledge International Handbook of Masculinity Studies**-Lucas Gottzén 2019-12-12 The Routledge International Handbook of Masculinity Studies provides a contemporary critical and scholarly overview of theorizing and research on masculinities as well as emerging ideas and areas of study that are likely to shape research and understanding of gender and men in the future. The forty-eight chapters of the handbook take an interdisciplinary approach to a range of topics on men and masculinities related to identity, sex, sexuality, culture, aesthetics, technology and pressing social issues. The handbook’s transnational lens acknowledges both the localities and global character of masculinity. A clear message in the book is the need for intersectional theorizing in dialogue with feminist, queer and sexuality studies in making sense of men and masculinities. Written in a clear and direct style, the handbook will appeal to students, teachers and researchers in the social sciences and humanities, as well as professionals, practitioners and activists.

Zur Geschichte der deutschen Sprache - Wilhelm Scherer 1995-12-21 Wilhelm Scherer (1841-1886) has gained wide recognition for his extraordinary accomplishments in linguistics as well as in literary studies.
His first and most important contribution to the development of linguistic science was his monumental work of 508 pages Zur Geschichte der deutschen Sprache, published in 1868. His stated objective was “to subject all aspects of the Germanic grammar to a new treatment.” While such a wording sounds rather modest, the actual implementation in his book, if viewed within the framework of his time, might very appropriately be called revolutionary. He broke with August Schleicher’s distinction between ‘development’ (in prehistorical time) and ‘decay’ (in historical time) in the history of language and replaced it with his notion of continuous, uninterrupted development. His survey of the relevant literature of his time is almost exhaustive, and his findings serve as the solid stepping stone for his own advances. To facilitate reading, the editor has supplied an index of names (with life dates), a complete listing of the literature referred to by Scherer as well as an introduction to Scherer’s life and his general scholarly achievements.
